like it?

No bueno. He got pissed  
at me. I got a lower grade  
than everyone else on the  
rotation :(

What?! Why??

Couldn't get the main  
experiment to work.

Thats not your fault tho ...  
He's wierd

I suspect he has a  
photographic memory!

Haha why do u say that?

He just goes off and

not relevant like he's  
reading it

Haha and he never looks  
you in the eye

Yep. Hopefully I can still  
join Achim

Have you talked to him?  
What lab are you in now?

Oh ya! He's friends with  
that Korean guy. I'm  
joining my second  
rotation, I've talked with  
her about it

Cool. I won't pretend that I  
understand nmr  
whatsoever :)

I love it!!! It's sooo cool :)

I hate development!! I read  
the ppt and all I got was  
certain mrnas are localized  
to diff parts of the embryo  
.... Like every other class

Yea, development is a  
drag. When it's not  
embryos it's disfigured  
kids :(

Haha yep, not my cup of  
tea

The best part is getting  
lost in the woods and then  
a giant bear randomly  
appears. Grrrr or w/e
